# 1. INTRODUCTION

# Sar Raw Data Acronym: SAR.RAW

Decommutated Raw Sar echos data suitable for input to a processor.

The ESA SAR.RAW format is based on the general definition of the SAR CEOS format (ref. ER-IS-EPO-GS-5902).

The product is stored on two CCTs or one exabyte.

# 1.1 General Structure

In the case of CCT, the first tape (CCT 1) contains the following three files :

**Volume Directory File** Data Set File

### 1.2.7 Notation conventions :

- \$ . the use of the "\$"' (dollar sign) in the documentation denotes a requirement for the blank character (ie. the ASCII pt EBCDIC space character).
- (n) this expression is used to denote the contents of an integer binary field which will vary depending on the product type or data origin and will have to be supplied by facility generating the tape.
- <....> i i i this expression is used to denote the contents of an alphanumeric field, which will vary depending on the product type or data origin and will have to be suppli by the facility generating the tape.
- <\$...\$> this expression is used to denote a blank field.
